Exercise 1.6   The Apache Project

a) Open www.apache.org in your browser.
b) Look at the different categories, pick one example project, and read about
its features.

Exercise 1.7   ACID2 Test

a) Use your Browser to do both the ACID2 [1] and ACID3 Test [5]. Is your Browser compatible? Which results do you get? Which topics are checked in both tests?
b) Use a Web page of your choice and check it using http://browsershots.org/. What is the result of your test?

Exercise 1.8

What is the difference between the XHTML and HTML 5 code shown on the slide? What could be the advantages for each approach?
